 By order of Foreman.

—Would it not be a good idea for this district at its coming school meeting to make some provision in regard to the lighting of our streets, so that the burden of the expense and trouble may not fall upon the few individuals who now have to bear it when the whole community and not those few alone are the gainers.

—At the meeting of the Pacific Engine Co. No. 1, held at their engine house, Factory Point, Monday evening, March 18th, the following officers were elected: W. H. Bundy, Foreman; M. H. OBITUARY.
 Died in Washington, March 13th, Col. George D. Harrington aged 55.
 The early years of Col. Harrington were passed in Manchester, this being the home of his parents. Completing his preparatory course at the Burr Seminary he entered Yale College in 1841. On his graduation four years later he parents had become residents of Bennington. Having married a daughter of George Lyman, Esq., of that town, he established himself in business at Columbus, Ohio. As the President of the Board of State Charities he was the author of valuable reports to the governor of the state which were published and widely circulated. Receiving the appointment of Superintendent of the Census Department at Washington, he has since resided in that city and has rendered valuable aid to the government. As a Christian man and author he was highly esteemed both in Ohio and Washington and is much lamented. He leaves a widow and several children, his oldest son being a Congregational minister in this state.

A Word to Doubters.
 There is a good English maxim that teaches us to "believe every man honest until we know him to be a villain." American customs seem to have reversed this law and appears to have given every man a villain until he has proved himself an honest man. As with people, so with things. Every article placed in our markets can lay claim to popular favor upon intrinsic merit and value alone. Continued popularity, therefore, is proof positive of intrinsic excellence. Dr. Pierce's Family Remedies are far more popular today than ever before. The people have tested them and know them to be genuine remedies for the diseases they are recommended to cure. The Golden Medical Discovery and Purgative Pellets are the best alternative, tonic, and cathartic remedies that can be used in chronic diseases of the stomach and liver. The world-wide popularity of the Favorite Prescription, as a never failing remedy for Female Diseases, would have alone secured to its discoverer the fame he so richly won. Dr. Saxe's Catarrh Remedy, of which Dr. Pierce is also proprietor, is recommended by those who have tested its virtues as a safe and reliable remedy for catarrh in its worst forms.

A report recently made, at the New York Dairy Fair, and largely copied in agricultural journals says: "The best Butter Color exhibited was Wells, Richardson & Co's., Burlington, Vt." Warranted to give a rich, golden color with no effect on the flavor or keeping qualities. Druggists keep it.

Perfected Butter Color, made by Wells, Richardson & Co., Burlington, Vt., is preferred by such authorities in doing work as Jones & Faulkner, winners of the \$100 first prize, and R. S. Houston, Kenosha, Wis., winner of the \$50 first prize at the Dairy Fair. They use it regularly.

In these days, when so many articles of utter worthlessness are being flouted upon the public, we feel it our duty to give special attention to those of real merit. On looking over our columns, the reader will find an advertisement of BRYAN CALVERT & CO., manufacturers of the celebrated friction matches that bear their name. This house was established in A. D. 1855. Their goods are safe and reliable. Try them.

THE LIGHT RUNNING HOME SEWING MACHINE!
THE KING OF ALL MACHINES.
 The "New Home" when once used will retain its place forever.

We would respectfully announce to the public that this popular Sewing machine is now offered for sale, as being the BEST FINISHED, EASIEST RUNNING & MOST DURABLE Machine now in the market. A Machine that will do work unsurpassed by any other machine. This Machine is so constructed that the power is applied directly over the needle, thus enabling it to sew the heaviest material with unequalled ease. It is simple in construction, and durable as iron and steel can make it. All its wearing parts are case-hardened or steel, and ingeniously provided with means for taking up lost motion. A self-setting needle, and winds the bobbin without having the machine operate. So we are justified in Warranting Every Machine for 3 Years.

I should be pleased to show the working of the machine to any one who will drop me a postal card or call on me.
